ATTENTION RESIDENTS

Windy Ridge, Slipper Hill, Hunter Circle, Tannery Dr. and Heather Circle

As you may have noticed there has been an increase in HMLD activity in your neighborhood recently. To continue to provide you with safe, reliable power, we are upgrading the underground conductor that feeds your area.

This is a fairly large and complicated process. It will include the digging of trenches along the grass plots in front of some of your homes, across some driveways, and across some of the roads. The areas disturbed will be remediated (repaved, loamed and reseeded, etc.)

The trench work is completed, and we are currently replacing loam. Driveway patching will begin within the next few weeks, and before winter.

We will continue to do our best to communicate throughout the process, keep the inconvenience to the residents to a minimum, and complete the job as soon as possible. We appreciate your patience during this project.

**Questions and concerns can be addressed at the Holden Municipal Light Department.
