

## Holden Municipal Light Department

### Power Cost Adjustment

MDPU # 127

Replaces MDPU # 114

Effective: January 1, 2011

#### **APPLICABLE**

To rates schedules identified as MDPU Nos. 120, 121, 122, 123 and 124.

#### **PROVISIONS FOR ADJUSTMENT**

The Power Cost Adjustment (PCA) to be applied in the current month period shall be the product of the following computation:

- $((A + B - C) / D) * E$
- PCA = In the monthly computation above, where:
  - A. The cost of fuel, purchased power, transmission and power related expenses from the second previous month.
  - B. The dollar difference between the actual power costs to be recovered in the most recent month period for which actual numbers are available and the actual revenue derived from the Power Cost Adjustment for the same month period as shown on the monthly Operating Statements of the Department.
  - C. Base cost of the purchased power and fuel imbedded in rates
  - D. Forecast kWh to which Power Cost Adjustment is to be applied for the month.
  - E. kWh billed for the month

Effective: January 1, 2011
