

Holden Municipal Light Department

Your Light Department is changing program administrators and is pleased to continue to offer qualifying residential customers free home energy audits, Energy Star Appliance rebates and Home Efficiency Incentives through the Home Energy Prevention Loss Services (HELPS) program.

If your house qualifies, a HELPS residential energy auditor will come out to your home to perform an energy audit. An audit typically takes 1 to 1 ½ hours depending on the size of your home. The audit includes:

- *Inspection of HVAC equipment*
- *Assessment of insulation levels in the walls, floors and attic and weather tightness of home*
- *Diagnostic testing – Infrared Scan*
- *Detailed report of the audit*

The energy audit report details recommended efficiency measures and their energy savings, estimated costs, and pay-back. Customers who complete an efficiency project as recommended in their audit are eligible for a Home Efficiency Incentive. (See reverse side for more information)

Call 888.333.7525 to schedule your free home energy audit. For more information, visit <http://www.munihelps.org>.

For customers who have already applied under our program that has been in place, those applications will be supported through December 31, 2016.

Our non-residential rebate programs remain unchanged and include a custom retrofit program and prescriptive lighting program. Visit our Commercial and Industrial GO Program page:

- ***<http://www.holdenma.gov/light-department/pages/commercial-and-industrial-go-program> for more information and application forms.***

Over 100 Years of Public Power, Public Service

Energy Star® Appliance Rebate
